

Public Health Laboratory Internship Opportunities

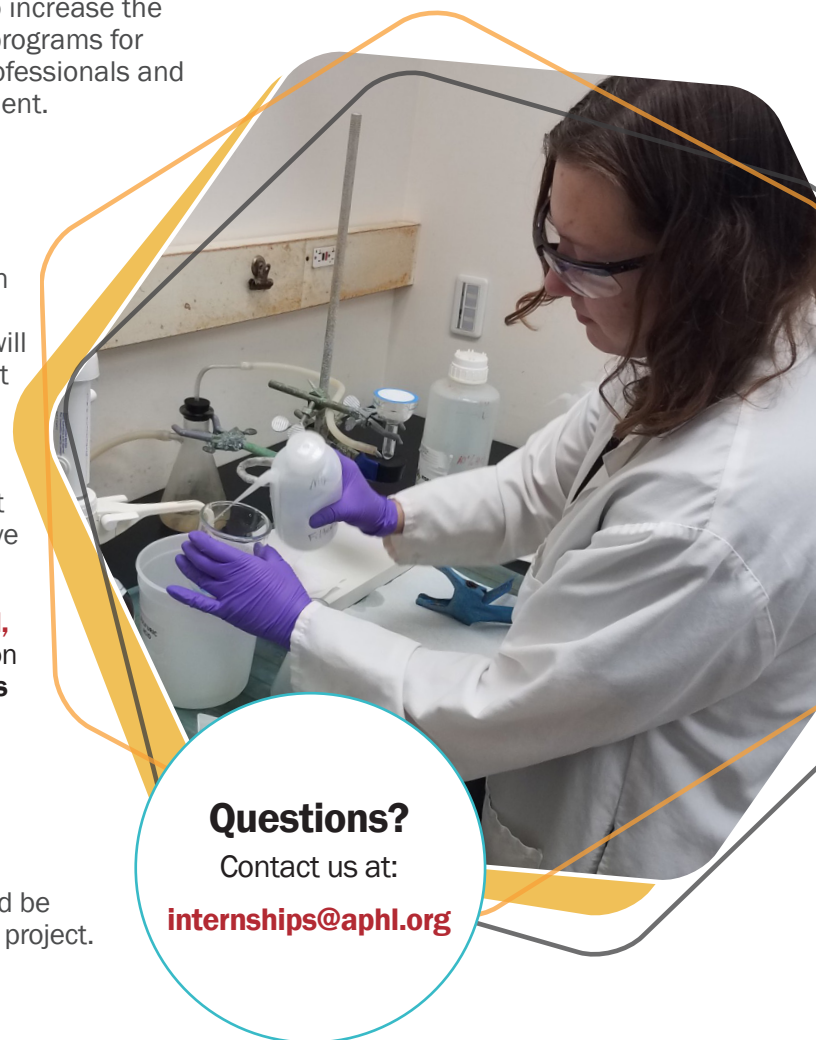

The primary goal of the Career Pathways program is to increase the public health laboratory workforce through hands-on programs for students, support for early-career and experienced professionals and opportunities for networking and leadership development.

Public Health Laboratory Internship: an APHL-CDC Initiative

The Association of Public Health Laboratories (APHL) and the US Centers for Disease Control and Prevention (CDC) are seeking students who are interested in exploring a career in the laboratory sciences. Interns will join a public health laboratory team to make an impact on protecting the health of our communities. Interns assist scientists working on meaningful projects while building skills such as general lab practices (e.g., pipetting, calibrations, etc.), data analysis, report management, problem solving, teamwork, and effective communication.

When we say “public health laboratory” we mean local, state and territorial government laboratories focused on protecting the public’s health. **That includes laboratories performing human, environmental, animal and food testing to monitor for and detect health threats.**

Not only will interns practice transferable skills such as laboratory techniques, problem solving, teamwork, and effective communication, but they will also have the opportunity to network with laboratory professionals and be supervised by a qualified mentor for the duration of the project.

internships@aphl.org

Eligibility requirements

- **US citizen or permanent resident** currently enrolled at an accredited institution and in pursuit of a relevant certificate, associate’s, bachelor’s or master’s degree
- **Hours and program length:** An average of 20 hours a week for 12 to 16 week
- **Start and end dates:** Flexible

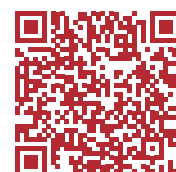

Application Requirements

- Completed application form
- Work history
- Reference (either academic or professional)
- College transcripts

Internship Benefits

- Network with public health laboratory professionals
- First-hand experience in public health laboratory initiatives
- Competitive stipend
- Build transferable skills

Public Health Laboratory Fellowship Opportunities

The primary goal of the Career Pathways program is to increase the public health laboratory workforce through hands-on programs for students, support for early-career and experienced professionals and opportunities for networking and leadership development.

Public Health Laboratory Fellowship Program: An APHL-CDC Initiative

The Association of Public Health Laboratories (APHL) and the US Centers for Disease Control and Prevention (CDC) are seeking degreed applicants who are interested in starting or furthering an exciting career in laboratory science while working collaboratively with industry leaders and developing professional networks.

Fellowships support a wide spectrum of public health laboratory program areas. Each fellow will be trained in alignment with established public health laboratory core competencies and will work on unique program-specific projects and other initiatives at host laboratories.

When we say “public health laboratory” we mean local, state and territorial government laboratories focused on protecting the public’s health. **That includes laboratories performing human, environmental, animal and food testing to monitor for and detect health threats.**

Regardless of host laboratory type, fellows will participate in training focused on techniques and competencies transferrable to a career in public health laboratory science.

Questions?

Contact us at:
fellowships@aphl.org

Eligibility Requirements

- US citizen or permanent resident with a bachelor’s, master’s or doctorate degree from an accredited institution
- **Start and End Dates:** Flexible
- **Hours and Program Length:** Approximately 40 hours a week, one to two years

Application Requirements

- Undergraduate and/or graduate transcripts
- 1-3 letters of recommendation
- Resume/CV
- Completed interest and experience survey
- Written narrative to application screening questions

Fellowship Benefits

- Experienced mentor actively working in the public health field
- Hands-on skills in laboratory techniques
- APHL student membership
- Competitive stipend and benefits
