

Where will you begin your Pathway to ISO?

Shari Shea, Director, Food Safety Program
APHL Annual Meeting Pre-Conference Workshop
June 1, 2014

What important
thing(s) did you
learn today?

How will you apply
today's learning in
your laboratory?

What will you put
in your
accreditation
action plan when
you return to
work?

How will you get started toward accreditation to the ISO
standard?

In what timeframe
will you
accomplish your
action plan?

How can your colleagues help you?

How can federal agencies help you?

How can vendors or industry help you?

How can your Associations help you?

What help do you need in working toward accreditation to the ISO standard?

4.2-Document Control Software

[Edit](#)

by yhale@aol.com on 10/9/2013 10:19 AM

If you have purchased a Document Control software, what are you using? Could you share some of the pros and cons?

If you have not purchased software, how are you handling document control in your laboratory?

Thanks for any feedback-this is one of the most frequently asked questions!

Document Control Software

[Edit](#)

Hello,

In Arizona our IT determined that they wanted us to have an in house system, so we are currently in the test phase of a Share point Document Control system. So far the test seems to be working well, they are still developing the "control" access for the system, but so far it looks good.

Kathryn

Free Webinar on Document Control by iPassport on 11/25/13

[Edit](#)

Genial Genetics, a Silver Level Sustaining Member of APHL, is hosting a free introductory webinar to iPassport, specifically tailored for APHL member laboratories, entitled "iPassport, a PHL Success." The webinar, organized in conjunction with APHL's Quality Systems Program, will be held on Monday, November 25, 2013 at 2 pm Eastern time. iPassport is a complete quality management system including comprehensive document control and compliance management tools. To date, the product has 1,250 users in 15 public health laboratories and is being utilized across a collective total more than 300 departments. Besides document control and general compliance management, the system has tools to deal with standards management, auditing, task management, equipment maintenance cycles, staff competency, complaint management, inventory control and staff training documentation. In order to participate in the webinar, APHL members must register for this free event at <http://www.genialgenetics.com/aphl-webinar>. For more information on iPassport, visit <http://www.genialgenetics.com>.
