

HOT TOPIC WEBINAR SERIES

Developing NBSChat - A Digital Education Tool for Sickle Cell Trait Follow-Up

This webinar highlighted the development and evaluation of NBSChat, a script chatbot designed to provide accessible education and emotional reassurance for parents receiving sickle cell trait (SCT) results.

Outsourcing Higher-Tier Testing Considerations

In this webinar, newborn screening (NBS) programs shared their strategies and practices for outsourcing tiered testing. Participants gained insights into how programs effectively manage the challenges of outsourcing while maintaining accuracy and minimizing errors.

Public Health Laboratory Fellowship Program

This webinar provides a comprehensive overview of the APHL Career Pathways in Public Health Laboratory Science initiatives, including our Public Health Laboratory Fellowship Program, NBS project examples, and its key features and application process.

Creating and Disseminating Newborn Screening Results Reports: Considerations & Strategies for Improvements

During this interactive webinar, participants discussed previous efforts, processes, and tools to help programs improve language, formatting, and end-user understanding of their NBS results reports.

NCAA Sickle Cell Requirement

This webinar provided participants an opportunity to discuss NCAA sickle cell status requirements for student-athletes and NBS.
