

APHL Academic Partnerships Collaboration Opportunities

CAREER PATHWAYS
in Public Health Laboratory Science
An APHL-CDC Initiative

Partner With Us!

Welcome to the Association of Public Health Laboratories, Inc. (APHL) Academic Partnerships Program (APP). We are excited about the opportunity to collaborate with educational institutions, professional associations and other organizations dedicated to advancing public health laboratory science and practice.

By partnering with APHL-APP, your organization can engage with us on a variety of initiatives, including research, education, workforce development and more. We are eager to learn about your institution and explore potential areas for collaboration. Your insights will be invaluable as we work together to identify and develop impactful partnerships that drive progress in public health laboratory science.

Making a Stronger Workforce

The APHL Academic Partnerships program supports the promotion of career pathways in public health laboratory science. These efforts include establishing and sustaining collaborative relationships between public health laboratories and academic institutions.

Partnerships are essential to the equity plan for public health. Through partnerships, we aim to promote and support the recruitment and retention efforts for the public health laboratory workforce.

Partnership Objectives

- Enhancing educational opportunities and training programs for students and professionals in public health laboratory science.
- Facilitating collaborative research and projects in public health laboratory science.
- Promoting networking opportunities between students, faculty and public health laboratory professionals.
- Providing technical assistance and support to public health laboratories.
- Advocating for policies that strengthen the nation's public health laboratory system.

Let's Get Started

1

**Complete the interest form to
*Become an APHL
Academic Partner!***

2

**Submit the Signed Memorandum of
Understanding (MOU)**

3

**Email Your Organization's Logo to
academic.partnerships@aphl.org
(high-resolution file)**

4

**Receive the APHL Academic
Partnerships logo via APHL**

5

**Schedule a meeting with the
APHL Academic Partnerships
Team to discuss partnership and
collaboration opportunities**

About APHL

The Association of Public Health Laboratories (APHL) is a 501(c)(3) non-profit organization uniquely representing state and local public health, environmental, agricultural and other public sector laboratories. APHL serves as a link between member laboratories, federal government agencies and private sector partners, and is the primary advocate for the laboratories that monitor and detect public health threats. APHL's members are a critical public health resource in identifying and monitoring outbreaks of infectious disease, chemical contaminants in people and the environment, and foodborne illness. In addition, these laboratories screen newborns for genetic and metabolic disorders; respond to natural disasters, industrial accidents and suspected biological, chemical and radiologic terrorism; conduct testing that supports enforcement of water, food, dairy and environmental safety laws; research disease trends and develop new laboratory technologies; and contribute to the formulation of state and national health policies.

About Our Members

APHL represents a unique membership of over 1,500 members from public health, environmental, agricultural and food safety laboratories; and individual scientists, public health officials, federal agency representatives, academicians and students, and other public sector laboratories.

VISION

A healthier world through quality laboratory systems.

MISSION

Shape national and global health outcomes by promoting the value and contributions of public health laboratories and continuously improving the public health laboratory system and practice.

VALUES

At APHL we strive to promote community; innovation; and scientific and professional integrity.
