

Bioinformatics Emerging Leader Program

June 24-27, 2025 | Bethesda, MD

Description

The Bioinformatics Emerging Leader Program aims to advance leadership skills in early to mid-career bioinformaticians in public health laboratories. The introduction and use of Next Generation Sequencing (NGS) in public health laboratories has added new personnel and skillsets to the public health laboratory workforce. With the influx of bioinformaticians into public health laboratories, there is a need for programs to build leadership skills and provide training on the unique aspects of bioinformatics in a public health context. Due to the interdisciplinary nature of bioinformatics, this program will build communication and leadership skills critical for careers in public health. In addition to building upon critical skills, emerging leaders will have an opportunity to build a network of public health bioinformaticians to connect with and learn from peers.

The program will consist of a series of virtual meetings, a four day in-person meeting, and a cohort project.

Program Objectives

- Support bioinformaticians' growth as emerging leaders in public health laboratory settings.
- Enhance understanding of applications of bioinformatics in public health.
- Develop and refine leadership and collaboration skills to work effectively within interdisciplinary teams.
- Build community among public health bioinformaticians.

Intended Audience

This program is intended for early to mid-career bioinformaticians working in public health laboratories looking to develop leadership skills and gain a better understanding of the complexities of bioinformatics in public health.

Location

APHL Headquarters Office, Bethesda, MD

Eligibility Criteria

- Applicant or nominee must be a bioinformatician currently working in a public health laboratory.
- Applicant or nominee should demonstrate potential for leadership and commitment to advancing bioinformatics in public health.
- Priority will be given to applicants or nominees that have been working in public health bioinformatics for at least one year.

Application and Nomination Process

Application/Nomination Form

Deadline: February 14, 2025

- To be considered for participation in this program, you must apply or be nominated.
- Applications or nominations are to be completed online. Only completed applications and nominations received by the deadline will be considered.
- Following completion of the application and nomination period, APHL will work to review and notify applicants of selection into the program.
- APHL will work directly with designated participants to arrange travel and accommodations for workshops. **All costs for this program including travel support, per diem and housing, will be covered for accepted participants by APHL.**

Bioinformatics Emerging Leader Program

June 24-27, 2025 | Bethesda, MD

Preliminary Agenda

Day 1 – Tuesday (June 24)

Morning:

- Introduction Public Health
 - The roles of various public health laboratory partners
- Sequencing in Public Health
 - Sequencing and bioinformatic implementations in public health laboratories
 - Translating genomic data to public health action

Afternoon:

- Epidemiology and Genomic Epidemiology Principles

Day 2 – Wednesday (June 25)

Morning:

- Communication Strategies
 - The importance of knowing your audience
- Group Communication Exercise

Afternoon:

- Facilitating Dialogue Exercise
- Messaging for Public Policy

Day 3 – Thursday (June 26)

Morning:

- Ethics and AI in Public Health Bioinformatics
 - Ethical challenges and considerations on the responsible use of data and privacy concerns.
 - Ethical and legal aspects of technology
- Data Governance Considerations

Afternoon:

- Common IT Challenges and Needs for Bioinformatics
 - Strategies for Communicating with IT
- Regulatory Frameworks

Day 4 – Friday (June 27)

Morning:

- Group Exercise

Potential Faculty:

- Logan Fink, Virginia DCLS
- Sean Wang, Scripps Research Institute
- Kelsey Florek, Wisconsin State Laboratory of Hygiene
- Kelly Oakeson, Utah Public Health Laboratory

Continuing Education Credits:

The Association of Public Health Laboratories (APHL) is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E. Program.

This training is supported by Cooperative Agreement #5NU60HM000803 funded by the Centers for Disease Control and Prevention. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of CDC or the Department of Health and Human services. This project was 100% funded by federal funds.
