

Table 1: Testing Available for Free for PHLs from Wadsworth Center

Pathogen	Test Catalog Name	Test Catalog ID	Tests Included
Diagnostic Immunology Tests; Points of Contact: william.lee@health.ny.gov, kelly.howard@health.ny.gov			
Chagas Serology *Requires pre-approval	Chagas (T. cruzi) Disease Serology	5290	T. cruzi IgG ELISA, T. cruzi total Ab ELISA
Syphilis	VDRL Serology, CSF	4717	VDRL Microflocculation
Babesia Serology	Babesia microti IgG-IgA-IgM Serology	595	Babesia microti IgG-IgA-IgM IFA
Parasitology, Point of Contact: s.antenucci@health.ny.gov			
Chagas Molecular *Requires pre-approval	Kinetoplastid Identification-Parasitology	3231	Molecular Detection (real-time PCR, PCR and/or sequencing)
Mycology: Point of Contact: Mycology@health.ny.gov			
Blastomyces Identification - Isolate	Blastomyces dermatitidis/gilchristii Identification	4610	Molecular detection (real-time PCR)
Coccidioides Identification - Isolate	Coccidioides immitis/posadasii Identification	823	Molecular Detection (real-time PCR, PCR and/or sequencing)
Histoplasma Identification - Isolate	Histoplasma capsulatum Identification	819	Molecular Detection (real-time PCR, PCR and/or sequencing)
Rare Mold and Dermatophyte Identification	Mold Identification from Isolate	650	PCR/Sequencing and conventional methods
Rare Yeast Identification	Yeast Identification from Isolate	659	MALDI-TOF MS and PCR/Sequencing
Antifungal Susceptibility for Dermatophytes	Antifungal Susceptibility Testing for Molds	822	CLSI Broth Microdilution Please also order 650
Virus Reference and Surveillance; meghan.fuschino@health.ny.gov			
Herpes Simplex Virus and Varicella Zoster	HSV and VZV Molecular Testing	808	HSV-1 DNA, HSV-2 DNA, VZV DNA by real-time PCR
Bacteriology; Point of Contact: kara.mitchell@health.ny.gov			
Syphilis, Chancroid and Chlamydia [#]	T. pallidum, H. ducreyi, C. trachomatis Identification	3210	Molecular Detection (real-time PCR, PCR and/or sequencing)
Lymphogranuloma Venereum (LGV) [#]	Lymphogranuloma venereum (serovar L-2) - molecular	644	Molecular Detection (real-time PCR, PCR and/or sequencing)
Arboviruses, Point of Contact: arbovirusnys@health.ny.gov			
See Table 2			
* Chagas testing requires prior-approval: Any laboratory requesting testing must first get approval from CDC before submitting the test request. Contact Sue Montgomery: zqu6@cdc.gov (404-718-4731) or parasiteslab@cdc.gov. Please communicate to the relevant Wadsworth POC that the approval has been given. # If Chlamydia is suspected, recommend ordering 644 as this includes Chlamydia detection and LGV. If chlamydia is detected in the panel it will be reflexed to the LGV assay (644).
