

National Enteric Reference Laboratory Community

**SAVE THE
DATE**

THURSDAY, JULY 11TH | 3-4PM EST

The **CDC's Enteric Diseases Laboratory Branch (EDLB)** and the **Association of Public Health Laboratories (APHL)** are pleased to announce the next meeting of the National Enteric Reference Laboratory Community which will feature a presentation on *Salmonella*.

This community will serve as a resource to provide support for public health laboratories that perform testing for *Campylobacter*, *Listeria*, *Escherichia* (including Shiga toxin-producing *Escherichia coli* and other diarrheagenic *E. coli*), *Shigella*, *Salmonella*, *Yersinia*, *Vibrio*, and other *Enterobacterales* (including *Cronobacter*). The community will have regular calls to engage and create conversation around a variety of topics related to enteric pathogens.

Please forward to your laboratory colleagues, and we look forward in building this community with you!
